Objective

To secure an internship where I can apply my skills, gain practical experience, and contribute to innovative projects in a collaborative environment.

Projects

Music Streaming App (YouTube Music Clone)

Feb 2025 - Present

Project Summary:

Developed **Musicify**, a full-stack YouTube Music clone using Spring Boot, MongoDB, React.js, and the Jamendo API. The backend handles JWT-based authentication, user and playlist management, and music search via Jamendo's public API. The frontend features a responsive UI with Redux for state management, secure login, music browsing, and playlist creation. Designed a modular architecture with clear separation of concerns and implemented persistent storage using MongoDB

JobGenie AI (AI-powered career assistant platform):

Aug 2025 – Present

Project Summary:

Developing an AI-driven platform to help freshers and job switchers optimize resumes, match job descriptions, and plan career growth. Building a Vue.js frontend and Go (Gin) backend integrated with Supabase PostgreSQL and Storage. Implementing GPT-4.1 and LangChain for AI-powered resume scoring, ATS-friendly rewriting, and personalized career roadmaps. Creating secure authentication, resume parsing (PDF/DOCX), and job match analysis features. Using Pinecone embeddings for similarity-based recommendations in an agile, JIRA-managed workflow.
